Consultation on the Implementation plan

Terminal Advisory Group
9 October 2013

Claire Hamoniau

CORRIDOR 2
ROTTERDAM-ANTWERPEN-BASEL / LYON

*Fast track* your rail freight

Results of the consultation

- 8 answers were received
  - 4 railway undertakings
  - 1 combined transport operator
  - 3 ports

- They mainly concern lines and terminals to include in the Corridor

Changes following the consultation (1)

1. Characteristics of RFC2

➢ Addition on the map of all bottlenecks which were described in the Implentation Plan: Ottignies/Auvelais/Namur, Aubange, Metz, Nancy and Lyon

Changes following the consultation (2)

2. Transport market study

➢ A few changes of the results of the study were requested

The Management Board sub-contracted the study to external consultants in order for results to be impartial. It is therefore not possible to change the results of the study

The only changes concern:

- The identification of Ghent as a major industrial center and rail user

- the removal of data on charging (rail freight rates between countries and freight rates between different modes), as results were inconsistent

CORRIDOR 2
ROTTERDAM-ANTWERPEN-BASEL / LYON

Fast track your rail freight

Changes following the consultation (3)

3. Objectives of the Corridor

➢ Train Performance Management (TPM) : role of RUs

They play an essential role in the TPM (working groups & bilateral meetings)

➢ European Performance Regime (EPR)

- ◉ TPM will test EPR, as it can help to improve the data quality of the information coming out of TIS, which is used for TPM

- ◉ In the short/medium term: no plan to implement the financial part of EPR

CORRIDOR 2
ROTTERDAM-ANTWERPEN-BASEL / LYON

Fast track your rail freight

Changes following the consultation (4)

4. Investissements

➢ Planning of ERTMS deployment (level, baseline, supervision type)

These data are included in the IP & a has since described these data

Level 1 version 2.3.0d full supervision, except :

◉ Saint Louis – Bâle : level 1, baseline 3, limited supervision
◉ Namur-Athus via Libramont will be level 2 version 2.3.0d full supervision
◉ Antwerp – Rotterdam is likely to be equiped with level 2 version 2.3.0d full supervision

➢ Dates at which national systems stop overlapping with ERTMS

Only dates for which decisions have been taken are indicated in the IP

➢ Other investments

No requests made for further investments except one (electrification of a line in a port) which will not be taken into consideration as not socioeconomically profitable

CORRIDOR 2
ROTTERDAM-ANTWERPEN-BASEL / LYON

Corridor lines (1)

➤ Requests for additional lines

- Nancy–Reding (via Blainville/Luneville): added (Jan 2015, TT2016)
- Lille-Arras via Seclin-Ostricourt-Corbehem/Don Sainghin-Lens/Seclin-Dourges-Lens: added (Jan 2015, TT2016)
- Somain-Valenciennes: not added
- Last kilometre to the Port of Calais: not added, the line stops where the owner is not RFF
- Paris-Lyon: not added
- Ambérieu-Vénissieux: added (Ambérieu-Lyon as diversionary line)
- Aulnoye-Quevy-Belgium (Mechelen): not added
- Connexion to the port of Zeebrugge: not added but CEF regulation is expected to address this point
- Lines of the port of Antwerp: added as connecting lines
- Athus – Luxembourg: added for 2013, as diversionary line

CORRIDOR 2
ROTTERDAM-ANTWERPEN-BASEL / LYON

Fast track your rail freight

Corridor lines
(2)

Phase 3: extension at the latest in November 2016

- based on market studies
- taking into consideration existing passenger and freight transport

RFC 2 maps are subject to the ExBo approval and to the adoption of the CEF regulation

Terminals

- **Terminals added**
  - Antwerp Main Hub
  - Vénissieux (FR)
  - Basel SBB RB

- **Terminals not added**
  - Antwerp-Schijnpoort (no activity other than driver change)
  - Antwerp-Zandvliet (same as DP world terminal)
  - Chatelet, BE (no activity)

- **Other**
  - Eurotunnel Terminal deleted
  - Basel terminal: change of name
  - Meerhout terminal deleted
