ERA Reporting to EU Commission

Common Interface available at company level

The two graphs below summarizing the feedback related to the availability of common interfaces are showing a difference in level of fulfilment between IMs and RUs. The majority of RUs is still developing, while a number of IMs have already finished the implementation of the common interface.

TSI TAF

Implementation of «Short Term Path Request»

Co-financed by the European Union
Connecting Europe Facility

easier, faster, safer

State of play

With regard to the Common Masterplan the exchange of TSI TAF messages for “Short Term Path Request” should have started as early as 2012 with a target implementation date of 2017 and a full implementation to be expected by 2021.

Several IM and RU have indicated that implementation might be delayed due to open questions.

- What is TAF/TAP compliant? Manual/Automatic/CI-Interface?
- What is „Short Term“?
- Which timetable period is affected (annual, late, ad-hoc, operational)?
- When are the CRD (locations) fully in use?
- Which message is implemented by when?
- Big bang or step-by-step implementation (P/F)?
- Does the development of PCS affect the TAF/TAP implementation?
- Does the RNE/FTE project „TT-Redesign“ influences the TAF/TAP?
- Is there a common agreed T-ID/P-ID migration plan?
- Financing and sponsors?
- RFC requirements?
- ...

- On March 17th, 2016 the TAF JSG has decided that a common approach shall be worked out in order to support a smooth implementation of the „Path request“ functions in TSI TAF. It was decided to establish a short questionnaire to be sent out with the 4th TAF reporting period
- On April 13th, 2016 the Telematic Expert Group „Planning“ has supported this common approach
- The IRG will work out the questionnaire together with CER, ERA and RNE
- The questionnaire will be sent out the IM and RU contact persons in June 2016
- Feedback will be analyzed and further actions will be discussed (e.g. TAF/TAP Path Request Common-Roll-Out-Plan)
